

STAFF SEMINAR SERIES

Waves and Currents on Southern California Beaches

*Bob Guza, Professor of Oceanography
Co-Director, Integrative Oceanography Division*

6 April 2006 • 12:30pm • 4500 HUBBS HALL

Pizza & drinks will be served at noon; talk begins at 12:30pm

Please join us for the next Staff Seminar, to be presented by SIO's Bob Guza. Dr. Guza studies waves, surfzone currents, and beach erosion along the Southern California coast. He is Co-Director of the Integrative Oceanography Division at SIO, and is part of the CDIP team, which provides real-time wave height information to surfers and other users around the region (cdip.ucsd.edu).

The Seminar Series is for administrative, technical, engineering and IT staff interested in learning more about the research underway at SIO and UCSD. The seminars are non-technical, and present a broad outline of the research or project presented.

We hope that you can come to meet with your colleagues and learn more about the research underway at SIO.

So that we have enough food, please rsvp to Laura Cravens-Wertz at lcravens@ucsd.edu by Monday, 3 April.
